The following formula is to be used -

Calculate % Retail Product:

$$[65.69 - (9.931 \times \text{Fat Thickness}) + (1.2259 \times \text{Rib Eye Area}) - (.013166 \times \text{Carcass Weight}) - (1.29 \times \% \text{ Kidney, Pelvic and Heart Fat})]$$

Calculate Carcass Value Added Per Day on Feed: CV/DOF=

$$\frac{[\text{Hot Carcass Wt.} - (.55 \times \text{Starting Wt.})] \times \% \text{ Retail Product} \times \text{Carcass Price, } \$/\text{lb.}/(.70)}{\text{Days on Feed}}$$

Prices used in the placing formula, Carcass Value Added per Day on Feed, will be based on prices bid on the cattle the day of processing. Discounts for Select grading carcasses will be applied as appropriate. Dark cutting carcasses will not receive additional discounts in the placing formula. The Hotel-Restaurant Window (C) will have premiums added for High Choice, and Low Prime and above of \$2.50 and up to \$5.00 per cwt. above the choice base bid respectively. For Lean-Lite Beef (B), the price bid for Choice cattle will be used in the formula for Select and Choice quality grades. To encourage carcass weights to be 850 pounds or lighter for Choice Retail Beef (A) and Lean-Lite Beef (B), the carcass weights between 851 and 900 pounds will be discounted \$4 per cwt. to adjust the carcass value per cwt. in the formula used to calculate Value Per Day Fed. Prices received for the cattle will be those as bid by the packer the day of processing. Generally prices received are bids based on 600 to 900 pound carcasses with discounts applied for Select, Standard and Bullock grading carcasses. Other discounts that can apply are for over 900 pound carcasses, under 600 pound carcasses, and Yield Grade 4 and 5 carcasses. Cattle payments reflect subtractions for trucking, inspection, yardage, beef checkoff, data collection and dark cutter assessment.
